## Public Summary

This document, titled “Risk Management Plan”, presents a comprehensive strategy to effectively identify, assess, and mitigate potential risks that may impact the success of AENEAS project. The primary objective of this plan is to proactively manage risks by implementing a structured process encompassing risk identification, analysis and evaluation, mitigation strategies, monitoring, documentation and reporting.

The Risk Management Tool (RMT) developed for AENEAS project is included in this document. It encompasses the risks identified in the Grant Agreement as well as new risks identified during the initial six months of the project. The RMT provides a detailed analysis of the nature and magnitude of these risks, highlighting the Work Packages (WP) they might impact, their likelihood, impact, severity, and the proposed measures to mitigate them in the event of their occurrence.

Throughout the project's duration, the RMT will be continuously updated to reflect any changes in the risk landscape. A final version of the RMT will be prepared at the project's conclusion in M36, encapsulating the collective risk management efforts undertaken.
