Public Summary

Deliverable D8.6 provides a structured overview of the ownership of all research results generated within the AENEAS project. In Horizon Europe projects, the default rule is that each partner (beneficiary) owns the results that it generates, and where results are developed jointly, ownership is shared unless otherwise agreed.

This deliverable captures, in a concise Results Ownership List, which legal entities own each project result at the time of reporting. Such a list is a required component of the final project report to the European Commission and helps ensure transparency about intellectual property (IP) and rights for future use or exploitation.

Maintaining and reporting research ownership is important for enabling effective protection, dissemination, and exploitation of outcomes, and supports compliance with Horizon Europe grant requirements.
