Deliverable D8.3

Data management plan

Deliverable Type	Report
Dissemination Level	Sensitive
Due Date (Annex I)	31.07.2023 (Month 6)
Pages	22
Document Version	Final
GA Number	101095902
Project Coordinator	Mohsen Akbarzadeh │ Flanders Make (FM) (Mohsen.Akbarzadeh@flandersmake.be)

LEGAL DISCLAIMER

Public Summary

This deliverable, "Data management plan (DMP)" represents a key element for an appropriate data management within AENEAS project. It provides a comprehensive overview of the data management policies relevant for AENEAS, including collection, storage, usage, production, processing and reusability of research data.

Relevant methodologies and standards for handling sensitive personal or confidential technical data will be outlined while following guidelines on FAIR data management in Horizon Europe and therefore keeping the generated research data findable, accessible, interoperable and re-usable. This DMP describes the data management life cycle for the data to be collected, processed and/or generated by AENEAS.

This DMP is considered as a living document and it will serve as a first draft and a basis for the upcoming updates in M18 and M36.
